Web Application Development

Practical 04

Create Registration Form Using HTML and CSS

1. Display the heading of the page as "Registration Form"

   ★ *For header add font-size,color,font-family, font-weight or font style*

2. Align all the field names like Student's Name, Registration Year, Registration Semester, Student Photo, Email,Phone Number,Degree Programme,Department and etc … to right in the table.

   ★ *For labels add font-size,color,font-family, font-weight or font style*

   ★ *For input fields add width, margin, padding, display, border, and box-sizing.*

3. Apply "Light Blue" as the background color for the left side cells in the table which contains field names like Student's Name,Registration Year, Registration Semester , etc…

4. Apply two buttons(Register and Cancel buttons)

   ★ *For buttons add background color, width, color, padding, margin, and border.*

5. Display your "University Logo" as a background image in the top right position of the web page.

6. When you create the registration form remember to follow "Cascade by Order" in CSS.

When you create the above Registration Form, you can add CSS through inline CSS/internal CSS/External CSS. Besides above mention parts, you can add any other additional elements to your student Registration Form to make it userfriendly.
